

Shreyash Gupta

Mumbai, India | +91 9321618045 | shreyashgupta401@gmail.com | [LINKEDIN](#)

Data professional specializing in building AI-powered applications, production-ready machine learning models, and efficient data pipelines to enable intelligent decision-making. Skilled in Python, SQL, Power BI, Flutter, and a range of ML frameworks, with experience developing solutions for real-time analytics, risk detection, and automated documentation generation.

EDUCATION

K J SOMAIYA INSTITUTE OF TECHNOLOGY

Bachelor of Technology, Artificial Intelligence and Data Science – CGPA - 8.48

Mumbai

2026

WORK EXPERIENCE

- **S4DS, KJSIT Chapter, App Development Intern**

Gained hands-on experience in Android app development using Flutter and Firebase, collaborating on in-house projects to build full-fledged applications with REST API integration and real-time database management

- **Freelance Web Developer (Remote | June 2025)**

Finyatri Solutions - Designed and developed a responsive company website (<https://finyatriresolution.info>) using HTML, CSS, JavaScript

PROJECTS

Intellex: [Repository](#) [Video](#)

- **AI-Powered Knowledge Hub:** Enables interns to access project files, presentations (PPTs, PDFs), and generate documentation using a Large Language Model (LLM).
- **Role-Based Access Control:** IT heads manage intern permissions, ensuring secure access to relevant files.
- **Automated Documentation Generation:** Interns can generate structured documentation from project files, streamlining the process.

AML Monitor: Anti-Money Laundering Website: [Repository](#)

- **Transaction Risk Detection:** Detects **potential money laundering activities** in bank transactions, classifying **risk levels (high, medium, low)** using machine learning models.
- **Admin Dashboard:** Admins can view all **user transactions**, including the **transaction location** and **associated risk level**.
- **Real-Time Risk Detection:** Transactions are analyzed instantly, based on insights from research papers on the quick nature of money laundering.

Kavach: [Repository](#) [Video](#)

- **Case Management & Communication:** Implemented **digital case tracking**, **real-time communication**, and **secure evidence collection**.
- **AI & Geolocation Integration:** Integrated **AI-based crime prediction**, **geolocation services**, and **public reporting** for enhanced safety.

SKILLS

Languages: C, C++, Python, Dart, Java

Libraries: NumPy, Pandas, Matplotlib, Tensorflow, OpenCV, Sci-kit

Tools & Software: Google Colab, VS Code, Kaggle, Firebase, Supabase, Git, GitHub, Power BI

Frameworks & Technologies: Flutter, APIs, Flask, Django

EXTRACURRICULAR ACTIVITIES

VOLUNTEER, *National Service Scheme, KJSIT*

- Participated in social initiatives like awareness campaigns, cleanliness drives, education, and healthcare promotion.

LEADERSHIP ROLES, *S4DS, KJSIT*

- Organized coding workshops, hackathons, and student club activities to promote technical learning and collaboration.

ACHIEVEMENTS

- **2nd Runner-up, Hack to the Future Hackathon, IEEE, Manipal University, Jaipur.**
- **2nd Runner-up, ALGOFORGE'25, IEEE, K J Somaiya Institute of Technology, Mumbai.**
- **Finalist in UNION BANK Hackathon'25, CSI, K J Somaiya College of Engineering, Mumbai.**
